

Have You Customized Your
EHS Software
Through **ASK-EHS** Yet?

Well, Here's Why You Should!

Why is Customization Important?

- Every industrial and non-industrial organization has distinct preferences and specifications
- Different geographies have varied safety standards like OSHA, OHSAS, EU-OSHA and others
- The organizational safety standards must be in alignment with the region's laws and adopted standards
- The safety software must be flexible to mix and match, scale and be cost-effective

Some Common Workplace Issues

Cost effectiveness and better time management

Suited preferences & specifications according to the local safety laws

Designed and personalized by team of HSE experts

Streamline processes and work on-the-go

Exactly fits the safety team's requirements and processes

Defines and delivers the organization's objective & purpose
